

PRAKHAR KEDIA

Software Engineer — AI/ML — Full-Stack Development

Jaipur, India —  +91 9660590056 —  kediaprakhar@gmail.com
 LinkedIn —  Github

SUMMARY

B.Tech CSE (AI & ML) student with hands-on experience building, testing, and improving full-stack enterprise applications, REST APIs, and AI/ML solutions. Strong foundation in DSA, OOP, DBMS, and software engineering with practical experience in Python, C++, JavaScript, React, FastAPI, MongoDB, and MySQL. Experienced in debugging, API integration, LLMs, NLP, OCR, and computer vision.

EDUCATION

Bennett University

B.Tech in Computer Science Engineering – Artificial Intelligence & Machine Learning

Aug 2023 – May 2027

Greater Noida, India

CGPA: 8.07/10

TECHNICAL SKILLS

Languages	Python, C++, JavaScript, SQL
Core CS	Data Structures & Algorithms, OOP, DBMS
Development	React.js, FastAPI, REST APIs, JWT, RBAC
Databases & Tools	MongoDB, MySQL, Git, GitHub, Postman
AI/ML	Machine Learning, NLP, LLMs, Prompt Engineering, RAG, TensorFlow, OpenCV, OCR

EXPERIENCE

Informatic Computech Pvt. Ltd.

Software Developer Intern

Jun 2026 – Present

Jaipur, India

- Developing an enterprise Asset Management platform using React, FastAPI, Python, and MongoDB for asset tracking, device requests, tickets, invoices, and operational workflows.
- Built and integrated REST APIs with JWT authentication, Role-Based Access Control (RBAC), and multi-tenant workflows for secure application operations.
- Worked on OCR-based document intelligence to extract information from asset and invoice documents and integrate extracted data into application workflows.
- Developed LLM-powered multilingual news summarization workflows using Python and FastAPI with structured prompt engineering and NLP processing.
- Tested and debugged application components and REST APIs, resolved functional issues, and integrated backend and frontend components using Git.

PROJECTS

AssetCare – Enterprise Asset Management Platform

React, FastAPI, Python, MongoDB

- Built an enterprise platform for asset tracking, device requests, tickets, invoices, vendors, and administrative workflows.
- Implemented JWT authentication, RBAC, multi-tenant workflows, REST APIs, and backend services for secure application management.
- Integrated OCR-driven document processing for extracting information from asset and invoice documents and automating workflows.

BiteWise – AI-Powered Nutrition Assistant

Python, TensorFlow, OpenCV

- Developed an AI-powered nutrition assistant that analyzes food images and provides nutrition-related insights.
- Built a TensorFlow CNN-based image classification pipeline with OpenCV preprocessing to identify food items from images.

Handwritten Text Detection & Word Segmentation

Python, OpenCV

- Developed an OCR preprocessing pipeline to detect handwritten text and segment individual words from document images.
- Applied Gaussian filtering, scale-space processing, and connected component analysis to improve text-region detection and word segmentation.

CERTIFICATIONS

Artificial Intelligence for Management – NPTEL, IIT Madras

87%

Introduction to Large Language Models (LLMs) – NPTEL, IIT Madras

Foundations of Deep Learning – NPTEL, IISc Bangalore
